TURN-KEY SOLUTION

FORGE

Your brand.
In every screen.

We build your brand and brand guidelines into a design system: colours, type, components and guidelines, ready to use in every app.

Brand guidelines as code | 85 components | Light and dark mode

A familiar service, with intelligence built into the core.

What it does

- **Colour, type and form**

  Colours as roles in light and dark mode to WCAG 2.2 AA, tone scales, typography, spacing, corners and depth, gathered as tokens.

- **The components**

  85 components in eight groups, from buttons and forms to charts, page frames and agents, in React and Svelte. Each has an example and guidelines.

- **The brand as a living page**

  The brand guidelines in one place: colours, type, graphic elements, the logo and the rules for how it is used in the services.

- **Guidelines**

  Principles, patterns, content and accessibility, and the decisions behind each choice, with why and what was turned down.

- **Two registers**

  One for the apps people use every day, dense and calm, and one for pages for outside users, with more room. Both on the same foundation.

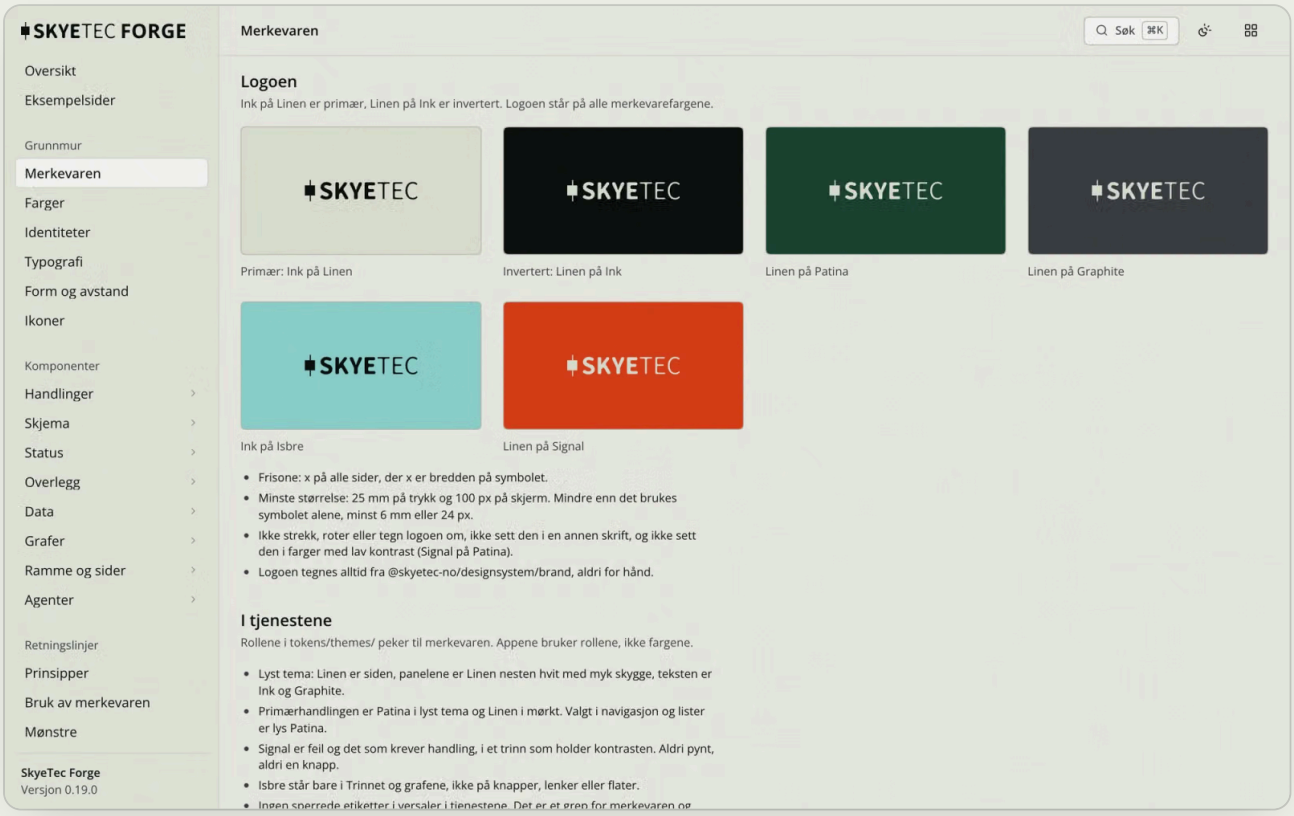

- **Updates itself**

  Every app gets a proposal to update when a new version comes out, so all the services stay alike.

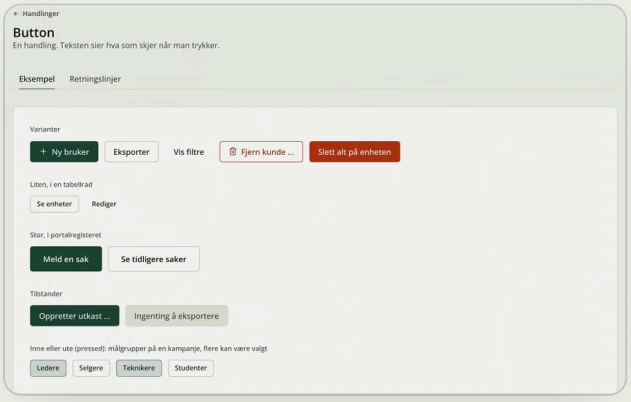

Works with

React · Svelte · Next.js · SvelteKit · GitHub Packages

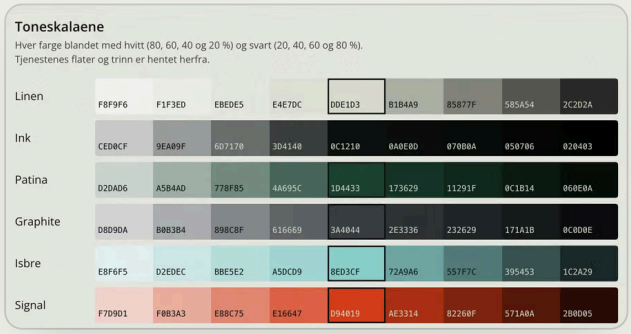

In use

The brand page: the logo on the six brand colours, with the rules for clear space, minimum size and use.

The Button component page: variants, sizes and states, with example and guidelines.

The tone scales: each brand colour in nine steps from light to dark, with its colour code.

Screenshots with example data.

Built on the harness

- **On the harness**
  The same governed agent layer under every service: each user's own access, a yes before changes, everything logged.

- **Where you already work**
  Log in at solutions.skyetec.ai, or use the service straight from Teams, Claude or SkyeTec Pulse.

- **Connected to the rest**
  One service or a bundle, linked to the systems you have through open interfaces and MCP.

Getting started

Try it free for 14 days. Pick a service or a bundle, and see how it works with your own data.
