TURN-KEY SOLUTION

IO

The whole IT estate.
One portal.

The customer portal for operations, security and costs. Azure and Microsoft 365 together for each customer, with Help when something needs solving.

- Costs, with a forecast for the month
- Security, users and devices
- Help: report an issue and follow it

A familiar service, with intelligence built into the core.

IO

What it does

- **What needs attention**

  The home page gathers what needs doing, such as devices that have not reported to Intune, or licences still costing money for deactivated users.

- **Costs**

  Azure usage and operations month by month, with a forecast to the end of the month.

- **Security and applications**

  Security, applications, users and devices together for each customer.

- **Help**

  Report an issue or a critical incident, and follow it from received to resolved.

Works with

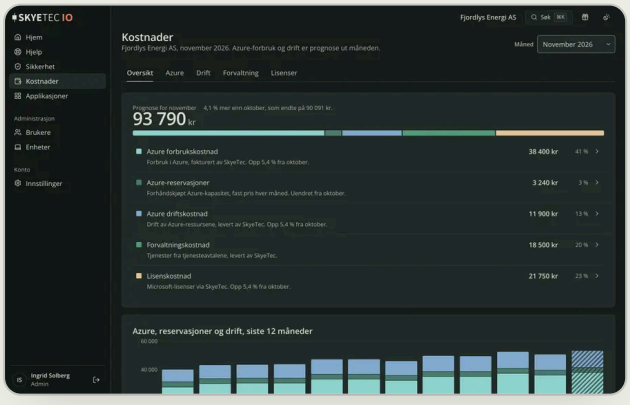

Azure | Microsoft 365 | Intune

IO

In use

The home page: what needs attention at the top, costs with a forecast for the month, and the state of security and modernisation.

Costs: the forecast for the month, split into Azure usage, reservations, operations, management and licences.

Help on the phone: report an issue or a critical incident, and follow it from received to resolved.

Screenshots with example data.

Built on the harness

- **On the harness**

  The same governed agent layer under every service: each user's own access, a yes before changes, everything logged.

- **Where you already work**

  Log in at solutions.skyetec.ai, or use the service straight from Teams, Claude or SkyeTec Pulse.

- **Connected to the rest**

  One service or a bundle, linked to the systems you have through open interfaces and MCP.

Getting started

Try it free for 14 days. Pick a service or a bundle, and see how it works with your own data.
