TURN-KEY SOLUTION

RECRUIT

Every candidate.
One next step.

Applications, interview rounds and follow-up across positions. The system keeps order, the recruiter decides.

- Applications straight from the careers page
- One next step for every candidate
- Privacy built into the flow

A familiar service, with intelligence built into the core.

RECRUIT

What it does

- **Positions**

  Ad text in Norwegian and English, a requirements profile and an owner. Active positions are published on the careers page.

- **Applications**

  Applications come straight from the form on the careers page, with consent, CV and attachments. Internal referrals are registered too.

- **One next step**

  Meet & greet, technical and commercial rounds. Every candidate has one next step and someone who owns it, based on status, dates and feedback from people.

- **People decide**

  The recruiter makes every decision. Moving a candidate on, rejecting and hiring are always done by a person.

- **Hiring**

  The contract is signed in Oneflow, and access is set up after signing.

- **Privacy in the flow**

  Deletion deadlines per step, notice before deletion, anonymisation on hiring and an audit log.

ON THE WAY

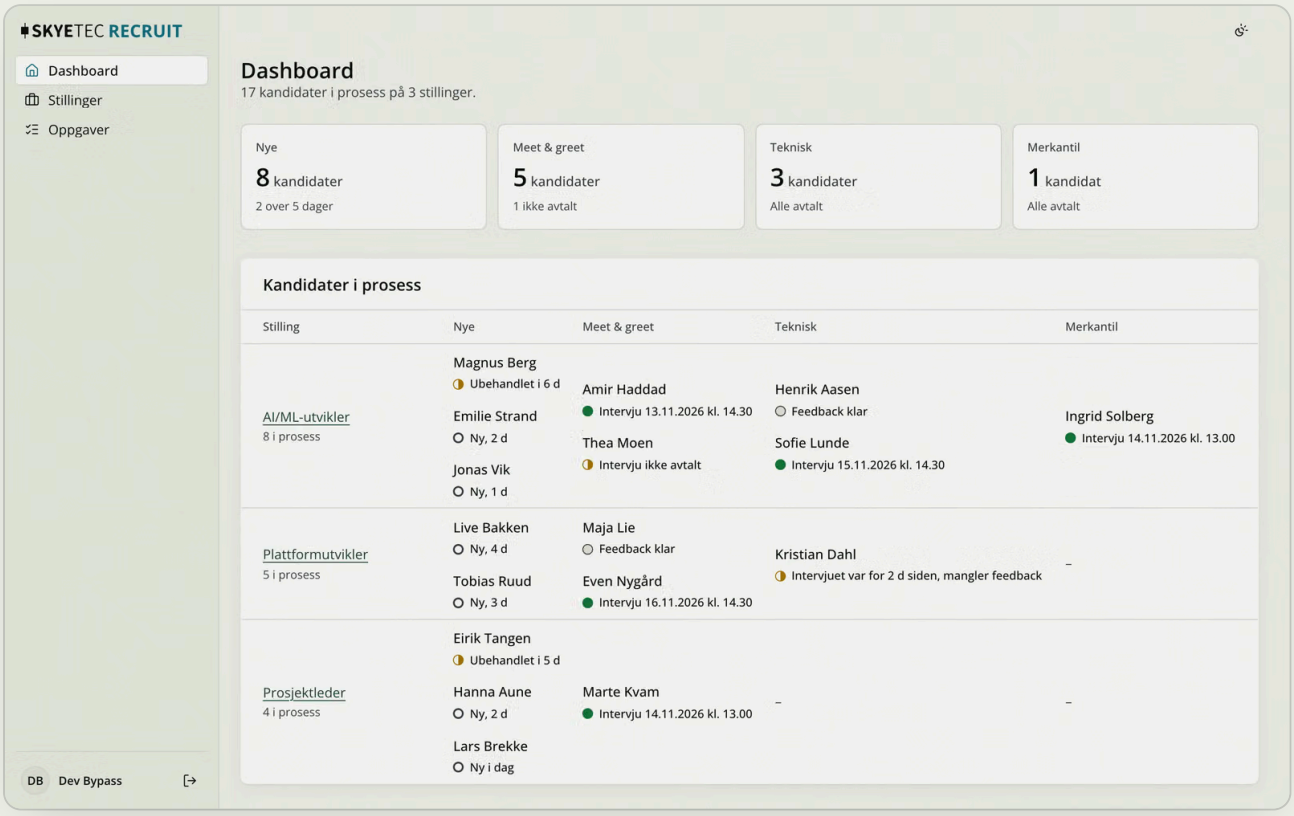

Candidate summary with sources

A short, neutral summary of each candidate, where every point refers to where it says so in the application. AI gives decision support, and the recruiter decides.

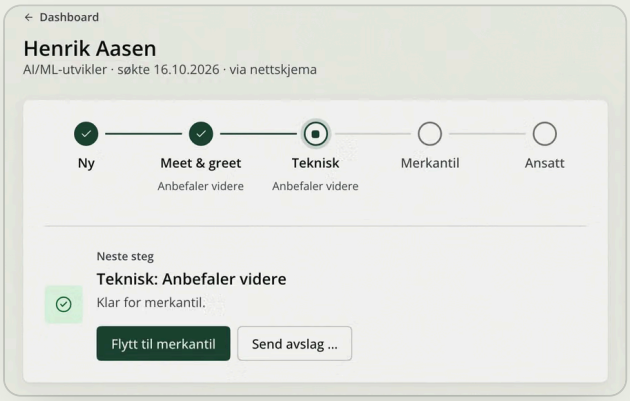

Works with

Careers page · Oneflow · Microsoft Entra ID · MCP

In use

The dashboard: candidates per step, and what happens next with each of them.

The candidate card: the recommendations from the interviews, and the next step, where a person decides.

Privacy: when the application is deleted, and what the candidate has consented to.

Screenshots with example data.

Built on the harness

- **On the harness**

  The same governed agent layer under every service: each user's own access, a yes before changes, everything logged.

- **Where you already work**

  Log in at solutions.skyetec.ai, or use the service straight from Teams, Claude or SkyeTec Pulse.

- **Connected to the rest**

  One service or a bundle, linked to the systems you have through open interfaces and MCP.

Getting started

Try it free for 14 days. Pick a service or a bundle, and see how it works with your own data.
